Engineering Transformation

Utthunga's
Application and Platform Engineering Services

Build future-ready applications that reduce IT costs, simplify organizational reporting & planning, and improve supply chain management with Utthunga's application and platform engineering services.

Whatever the requirement is — from agile transformation, application management, application modernization, and architecture modernization to intelligent automation, cloud engineering, and DevOps solutions — our technology partnership has you covered. Leverage this expertise to drive business transformation and unlock maximum digital value across the IT ecosystem.

Turbocharge Business Transformation and Unlock Maximum Digital Value Using Our Application and Platform Engineering Services

Our Application and Platform Engineering Offerings in a nutshell

Enterprise Technology

- AI and ML
- Robotic Process Automation (RPA)
- Cloud Computing
- IIoT
- Big Data Analytics
- Blockchain
- Low-code/No-code Platforms
- AR & VR
- Natural Language Processing (NLP)

- Microservices Architecture
- API-first Architecture
- Quantum Computing
- Human-centered Design
- Digital Transformation
- Predictive Analytics & Maintenance
- Cybersecurity and Cyber Resilience
- Business Process Management (BPM)

Software Development & Maintenance Services

- **Custom Applications**
  - Modernization, Development, and Management
  - Mobile Apps Development

- **Digital Services**
  - IoT
  - IT-OT Convergence

- **Enterprise Applications**
  - ERP/CRM/PLM
  - BI/Analytics
  - Supply Chain/ Demand Forecasting

Automation Services

- Process Automation
- Test Automation
- Cognitive Automation
- Automation Ecosystem

Infrastructure, Cloud, and Security Services

- **Infrastructure**
  - Consulting & integration
  - IT Service Management

- **Cloud**
  - Cloud Migration
  - Hybrid Cloud Solutions

- **Security Services**
  - ZTA, SIEM, SOC, etc.
 - Disaster Recovery
  - DevSecOPS

Applications **We Build**

- KPI Dashboards
- Solution Discovery and Advisory Applications
- Managed Services Applications
- Decision Support Systems
- Knowledge Management Systems
- Analytical Work Benches for Insights and Advisory
- Supplier Relationship Management Systems

- Customer Relationship Management Systems
- Master Data Management Systems
- Data Transformation/ Data Visualization/ Business Intelligence/ Big Data Engineering Applications
- Supply Chain Management Applications

- Warehouse Management Systems
- Remote Inspection & Monitoring Systems
- CMMS Applications
- Ingestion Management Systems
- AI/ML Applications
- IIoT Platform/ IoT Cloud Platform/ Perceptive IoT Platform

Our Technology and Engineering **Capabilities**

Java | JS | django | ORACLE | Ruby | ANGULAR | Spark | RAILS

MySQL | python | R Project | laravel | Microsoft SQL Server | PHP | Express

Vue.js | mongoDB | Microsoft Power Platform | PowerShell

Swift | STRUTS | HTML5 | { } | C# | Kotlin | .NET Core | Scala

kafka | PostgreSQL | IONIC | Flutter | kony | Dart

Microsoft .NET | React | MariaDB | netbiscuits | node JS

This is just the **tip of the iceberg!**

To learn more about our incremental capabilities in **production, sensing and manipulating, monitoring and supervising, manufacturing operations management, and cloud**, click here
